**CLOSURE OF CONCORD HILL ROAD AT MAIN STREET IN PITTSFIELD**  
**FOR RETAINING WALL AND DRAINAGE REPAIRS**  
**AND THE**  
**OPENING OF A DETOUR ROUTE FOR THE DURATION OF THE**  
**ESTIMATED 10 WEEK ROAD CLOSURE**

The New Hampshire Department of Transportation and the Town of Pittsfield announce the scheduled closure of Concord Hill Road, within 250 feet of Main Street, to allow for the reconstruction of a failing stone retaining wall between Concord Hill Road and the Suncook River and repairs and replacement of drainage structures along Concord Hill Road in the Town of Pittsfield. A Detour route around the work zone will be signed and additional signs posted to warn through vehicles to avoid the work area

The road closure and detour around the retaining wall and drainage work area is planned to be in place by the end of day on Monday July 12, 2010, weather and utility relocation work permitting. Large trucks, vehicles with trailers and delivery vehicles should avoid Concord Hill Road and Loudon Road, using Leavitt Road as an alternative to access Main Street and Downtown Pittsfield. Local non-through traffic will be permitted on Concord Hill Road for the duration of the project

NHDOT Bridge and Highway Maintenance forces will be responsible for the construction work, which should be completed by mid September 2010.
